MUKUL KUMAR – 8171515448 , mukul.23b0101133@abes.ac.in

MONU KUMAR – 6397920687 , monu.23b0101264@abes.ac.in

Faculty Guide's name:

Ms Aditi Arora

Project Title:

Health care management web application

TARGET SET FOR THE WEEK:

Expanding our CSS knowledge by diving into additional topics such as border, box-sizing, and border-radius to enhance element styling and layout control. Moreover, Explored the display property, with a particular focus on display: flex. This includes understanding properties like flex-flow for managing direction and wrapping, justify-content for aligning items horizontally, align-items for vertical alignment, and gap for controlling spacing between elements. These concepts are crucial for creating flexible, responsive, and visually appealing layouts.

PROGRESS/ACHIEVEMENT FOR THE WEEK:

All the weekly targets were successfully achieved within the designated timeframe, demonstrating effective planning and timely execution.

FUTURE WORK PLAN

We will be delving into more advanced CSS topics, including display: grid, which allows for the creation of complex, grid-based layouts with precise control over rows and columns. Additionally, we shall explore hover animations to enhance interactivity and user experience by adding dynamic visual effects triggered when users hover over elements. These advanced techniques are essential for building modern, engaging, and responsive web designs.

Project Title:

Health care management web application

TARGET SET FOR THE WEEK:

Learning foundational concepts of CSS, focusing on various properties and their applications. This includes font properties such as font-family for setting text styles, font-size for controlling text size, font-weight for adjusting text thickness, and color for defining text colors using formats like hex codes, RGB, and HSL. exploring dimension properties like height and width to control the size of elements, along with different units such as px for fixed measurements, % for relative dimensions, and rem or em for scalable and responsive designs. Additionally, learning to work with images, setting their height and

width for proper scaling while maintaining aspect ratios, and using properties like max-width and object-fit to ensure responsiveness. These concepts are essential for creating visually appealing and user-friendly web pages.

PROGRESS/ACHIEVEMENT FOR THE WEEK:

All the weekly targets were successfully achieved within the designated timeframe, demonstrating effective planning and timely execution.

FUTURE WORK PLAN

Laying a solid foundation in fundamental CSS concepts to seamlessly transition into more advanced and complex topics in the future.

Project Title:

Health care management web application

TARGET SET FOR THE WEEK:

We explored the concept of the display: grid property, along with key related properties such as grid-template-columns, grid-template-rows, and gap. These tools proved invaluable in creating structured, grid-type layouts, allowing for precise control over the placement and spacing of elements. Additionally, we delved into the hover property, which is used to define styles or animations that are triggered when a user hovers over an element. This feature is particularly effective for adding interactivity and

enhancing the user experience by providing visual feedback or dynamic effects. Together, these concepts have significantly expanded our ability to design modern, responsive, and engaging web pages.

PROGRESS/ACHIEVEMENT FOR THE WEEK:

All the weekly targets were successfully achieved within the designated timeframe, demonstrating effective planning and timely execution.

FUTURE WORK PLAN

We will start learning the foundational concepts of JavaScript to create more responsive, interactive, and effective websites. This includes understanding how to manipulate the DOM (Document Object Model), handle events, and implement dynamic behaviors that enhance user engagement. By integrating JavaScript into web development, I aim to build websites that are not only visually appealing but also functionally robust and highly interactive, providing users with a seamless and engaging experience.
